

Application No. 09/931,392  
Amendment "E" dated September 17, 2004  
Reply to Office Action mailed August 11, 2004

**AMENDMENT TO THE SPECIFICATION**

In numbered paragraph 64 of the DETAILED DESCRIPTION OF THE INVENTION,  
please amend as reflected in the following marked-up version of said paragraph:

[064] It will also be appreciated that split neck 314 allows an attachment member to be selectively mounted thereon by pressing at least a portion of an attachment member over the skirted members 332a, 332b. Skirt members 332a, 332b, which collectively form a skirt with a substantially circular cross section, can at least temporarily prevent the attachment from being moved off the neck 314 as the attachment rotates about neck 314.
